EDUCATION

Under Graduation

Vignana Bharathi Institute Of Technology

12/2021 - Present

8.02 CGPA

12th Standard

Sri Chaitanya Junior Kalasala, Nallakunta

07/2019 - 05/2021

9.5 GPA

10th Standard

Naagarjuna high school

04/2018 - 03/2019

9.8 GPA

PERSONAL PROJECTS

Flask Microservices Authentication System

- Developed a Flask-based microservice application implementing a user authentication system with features like registration, login, and logout.
- The application uses SQLAlchemy for database operations and is connected to a MySQL database.
- Designed and set up proper routing for efficient navigation and ensured the project adheres to clean architecture principles.

Library Management System (Java) (Real time project)

- Designed and implemented a comprehensive library management system to automate cataloging, borrowing, and returning of books.
- Utilized Java Swing for GUI and JDBC for database connectivity, resulting in an efficient and userfriendly application.

Smart Home Energy Management System using Machine Learning (Minor Project)

- To develop a Smart Home Energy Management System using traditional machine learning algorithms that predicts energy consumption and optimizes usage based on historical datasets, without relying on real-time sensors.
- The project focuses on creating a Smart Home Energy Management System (SHEMS) that leverages traditional machine learning algorithms to analyze historical datasets for energy consumption.

SKILLS

Back-end Development

competitive programming

Database Management: MySQL, SQLAlchemy

Frameworks: Angular, Node.js, Bootstrap, Angular Material, Express.js.

Front-end Development

Version Control: Git,Github

CERTIFICATES

Udemy-The Complete Web Development Bootcamp 2024 by Dr.Angela Yu.

LANGUAGES

HTML/CSS

Full Professional Proficiency

JAVA

Full Professional Proficiency

JavaScript

Full Professional Proficiency

Python

Full Professional Proficiency

Structured Query Language(SQL)

Full Professional Proficiency

TypeScript

Full Professional Proficiency

INTERESTS

Building scalable web applications

Cloud computing and deployment (AWS)

DevOps practices (Ansible, Terraform, CI/CD pipelines, Docker, Kubernetes)

Learning new Front-end frameworks and Back-end technologies

Microservices architecture
